

EEPOS – Complete Enterprise Email Archive Solution

Trillian Infosüsteemid Ltd

www.trillian.ee/eepos

Introduction

- ❖ Real-time centralized automatic email archiving
- ❖ Powerful and fast searching for easy email access
- ❖ Targeted for small and medium-sized businesses and organisations using email daily

Benefits

- ❖ Protection of business-critical information against random deletion
- ❖ Protection of intellectual property
- ❖ Protection of company's interests in legal disputes

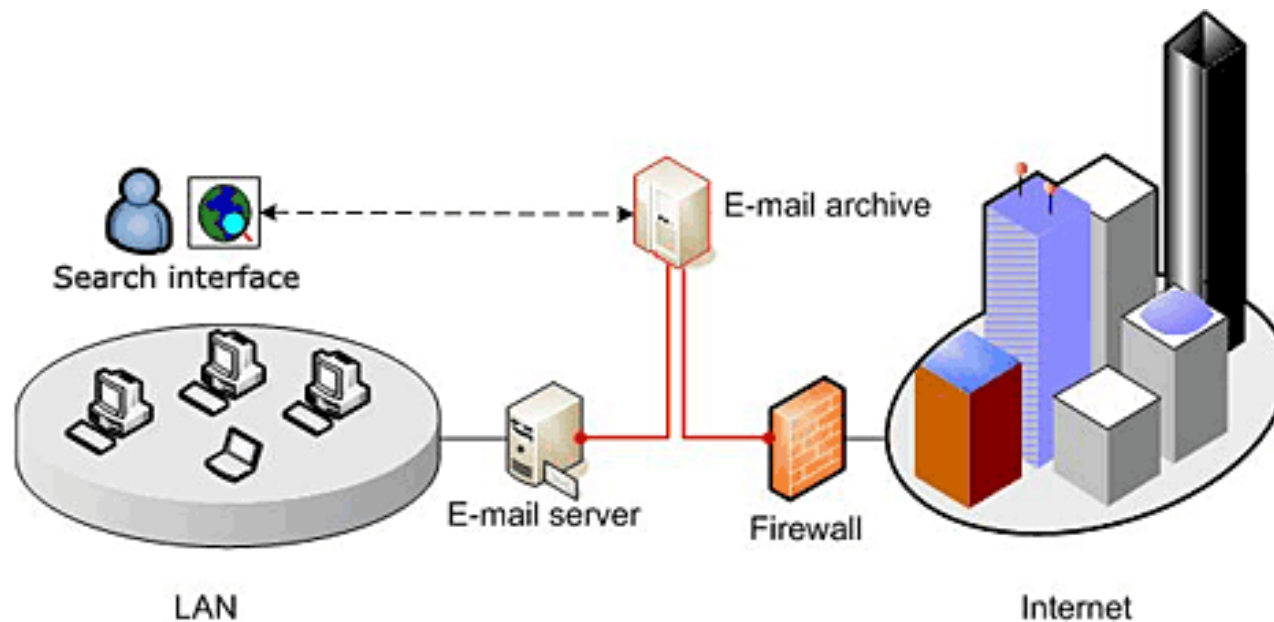

Financial benefits

- ❖ Low cost of ownership
 - ❖ Competitive price
 - ❖ License is granted per server - regardless of number of email users
- ❖ No need to purchase any additional software
 - ❖ EEPOS works with any existing email server
 - ❖ Full-featured package is built with free technologies

Main Features

- ❖ Easy to use interface
- ❖ Multilingual interface
- ❖ Seamless integration
- ❖ Powerful search capabilities
- ❖ Manageable access rights
- ❖ Reliability under heavy load

Typical Installation

The product is installed between the e-mail server and the firewall, all e-mail traffic is routed through it. Minimal configuration changes are needed to the existing infrastructure.

Archiving and Searching

- ❖ All messages that are sent or received by all users are automatically archived.
- ❖ All messages are recoverable from the archive
- ❖ Powerful, easy and fast archive searches:
 - ❖ by sender
 - ❖ by recipient
 - ❖ by date
 - ❖ by subject (full-text)
 - ❖ by body-text (full-text)

Integration

- ❖ Seamless integration with existing email infrastructure (MS Exchange Server, Lotus Domino, Unix/Linux etc).
- ❖ No changes in daily working routines to e-mail users.
- ❖ Easily extendible to include virus and spam filtering.
- ❖ The software is a full-featured package, there is no need to purchase or install any additional software for individual tasks.

Security

- ❖ User accounts are managed by system administrator.
- ❖ Access to the web interface is allowed only to registered users.
- ❖ Access to the e-mails is allowed based on the sender/receiver security filter.

Trillian Infosüsteemid Ltd

- ❖ Established in 2000
- ❖ Main competence: development of enterprise information systems
- ❖ Number of employees: 10 (mainly developers)
